**DETAILED ACTION**

***Claim Objections***

1. Claims 5 and 7 are objected to because of the following informalities: In claim 5, line 5, the numeral “(170)” should be --(160)--. In claim 7, line 1, the word “value” should be changed to --valve--. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-11 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Laflamme et al '322.

Laflamme et al '322 discloses an applicator comprising all the featured elements of the instant invention, note specifically matrix material 12; a cavity with a reservoir 20; and a one-way valve 30.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Colburn et al discloses an applicator with a sponge and one-way valve.
